

A manual of Telemarketing Campaign

Figure 1

To navigate through the Telemarketing Campaign story, you can click directly to the tabs such as Model Comparison, Opportunities, Best Call, Recommendation or Forecast to go to that dashboard section. The arrow buttons on the left and right can be clicked to move sequentially through the dashboards in order. See Figure 1.

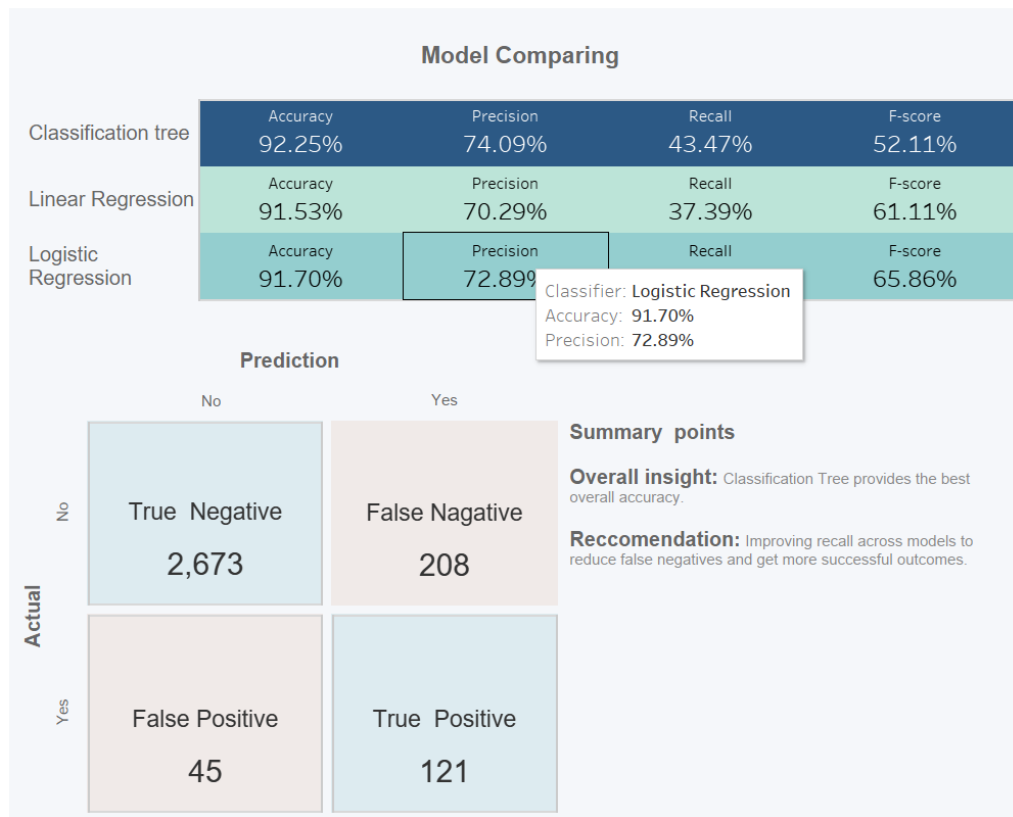

Figure 2

Figure 2 dashboard includes a filter table that allows users to switch between different classification models. To choose a model simply move the mouse over the table at the top then the confusion matrix below will dynamically display the model's specific performance in terms of True Negative. False Negative, False Positive and True Negative.

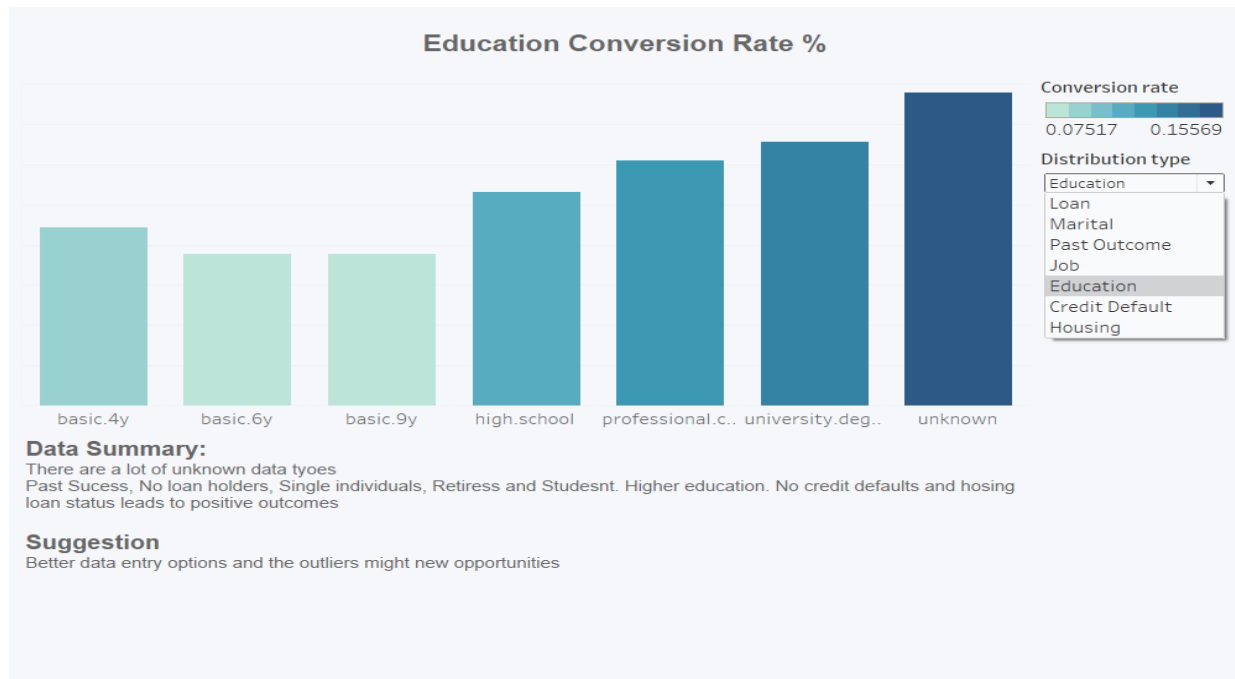

Figure 3

The dashboard Figure 3 has a dropdown filter. The users can choose an attribute from Loan, Marital, Past Outcome, Job, Education, Credit default and Housing from the dropdown menu. When an attribute is selected, the graph updated to show conversion rate related to that specific attribute.

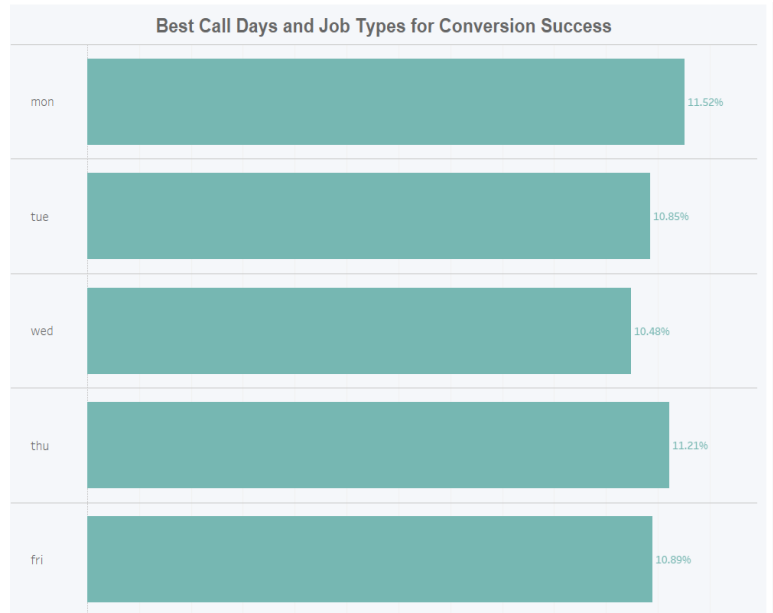

Figure 4

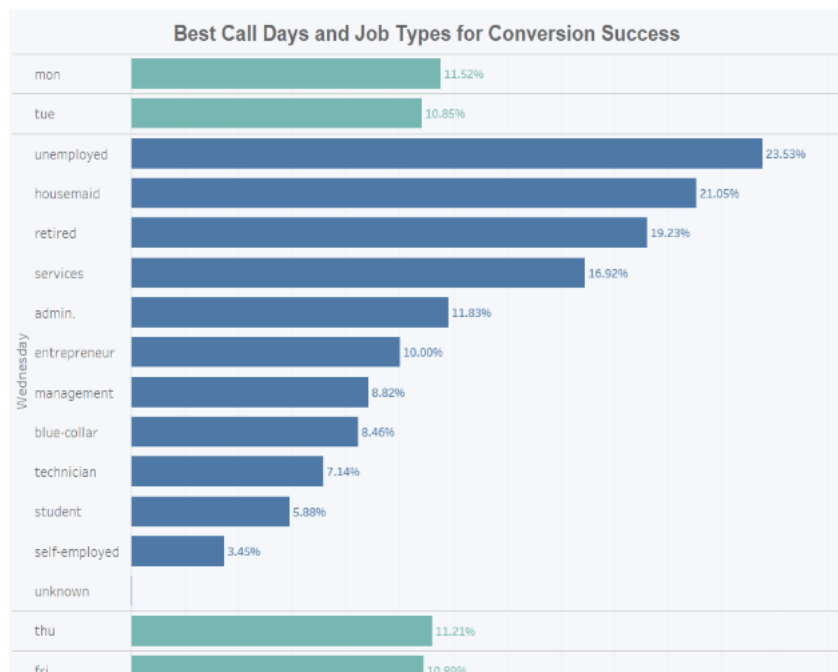

Figure 5

To use the Best Call Days and Job Types, Figure 4, select a specific day from the bar chart (e.g., Monday, Tuesday, or Wednesday). This will update like on the chart Figure 5 to display the top-performing job types for that particular day, helping to focus calls for maximum success. If

you want to view the job types for a different day, simply select a different day on the chart, and the job-specific data will update accordingly. To return to the original view showing only the call days, double-click any job type on the chart Figure 4

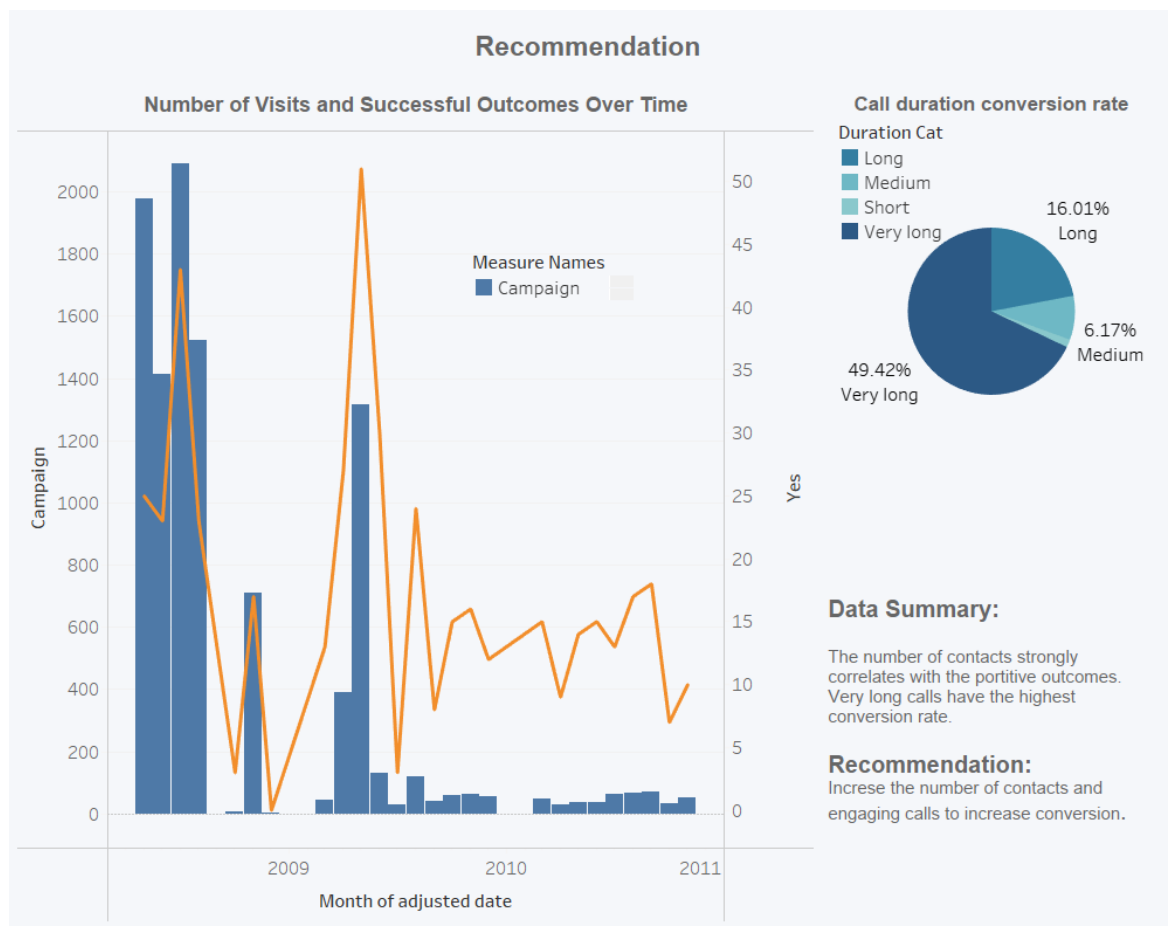

Figure 6

To

use the next chart, Figure 6 dashboard is static without any user interaction.

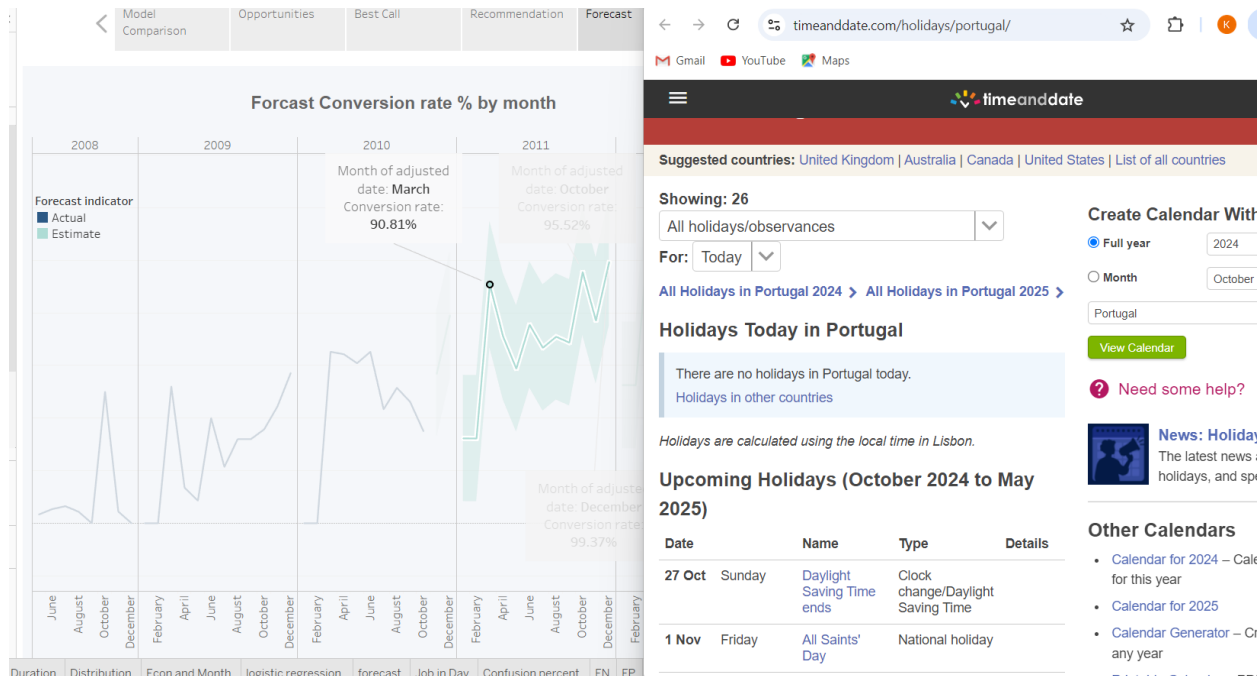

Figure 7

Finally, the forecast dashboard, double-click on any month or data point within the chart. An external link is triggered to open providing references on Portuguese holidays. See Figure 7
